Developmental Biology

An International Journal
Published under the Auspices of the
Society for Developmental Biology

EDITOR-IN-CHIEF: Elizabeth D. Hay

ASSOCIATE EDITORS

Igor B. Dawid
Keith R. Porter
Frank H. Ruddle
John W. Saunders, Jr.
Judson D. Sheridan
Gordon M. Tomkins

ASSISTANT EDITOR: Mary J. Powers

FEATURE EDITORS

Eugene Bell
Francis J. Manasek

ADVISORY EDITOR

Mac V. Edds, Jr.

VOLUME 27, 1972

DEVELOPMENTAL BIOLOGY 27, iii–vi (1972)

Contents of Volume 27

NUMBER 1, JANUARY

Developmental Biochemistry

F. C. DAVIS JR. AND F. H. WILT. RNA Synthesis During Oogenesis in the Echiuroid Worm *Urechis caupo* 1

GIOVANNI MARZULLO AND ELEANOR DESIDERIO. Tissue Distribution of Some Cartilage Enzymes 13

GIOVANNI MARZULLO. Regulation of Cartilage Enzymes in Cultured Chondrocytes and the Effect of 5-Bromodeoxyuridine 20

Developmental Cytology

WILLIAM DEWITT, RICHARD P. PRICE, G. LAWRENCE VANKIN, AND E. MICHAEL BRANDT. Production of Erythroid Cells in Phenylhydrazine-Treated *Rana catesbeiana* Tadpoles 27

BRIAN S. SPOONER AND NORMAN K. WESSELLS.An Analysis of Salivary Gland Morphogenesis: Role of Cytoplasmic Microfilaments and Microtubules 38

Developmental Genetics

W. JAMES MOORE AND BEATRICE MINTZ. Clonal Model of Vertebral Column and Skull Development Derived from Genetically Mosaic Skeletons in Allophenic Mice 55

MARGARET STEWART, COLLIN MURPHY, AND JAMES W. FRISTROM. The Recovery and Preliminary Characterization of X Chromosome Mutants Affecting Imaginal Discs of *Drosophila melanogaster* 71

Experimental Morphogenesis

D. E. HART AND T. W. BETZ. On the Pars Distalis Hormonal Activities Involved in Duodenal Development in Chick Embryos 84

CHARLES CINTRON. Organ Culture of Chick Embryonic Cornea 100

LIDIA KIREMIDJIAN AND M. J. KOPAC. Changes in Cell Adhesiveness Associated with the Development of *Rana pipiens* Pronephros 116

Features

News, Opinion and Letters 131

Current Literature 137

NUMBER 2, FEBRUARY

Developmental Biochemistry

HERBERT G. LEBHERZ. The Ontogeny of Fructose Diphosphate Aldolase B in the Chick 143

RICHARD O. HYNES, RUDOLF A. RAFF, AND PAUL R. GROSS. Properties of the Three Cell Types in Sixteen-Cell Sea Urchin Embryos: Aggregation and Microtubule Protein Synthesis 150

SHALOM W. APPLEBAUM AND LAWRENCE I. GILBERT. Stimulation of Adenyl Cyclase in Pupal Wing Epidermis by β-Ecdysone 165

Developmental Cytology

JORAM PIATIGORSKY, HENRY DEF. WEBSTER, AND SYDNEY P. CRAIG. Protein Synthesis and Ultrastructure during the Formation of Embryonic Chick Lens Fibers *in Vivo* and *in Vitro* 176

Developmental Genetics

H. TOBLER, K. D. SMITH, AND HEINRICH URSPRUNG. Molecular Aspects of Chromatin Elimination in *Ascaris lumbricoides* 190

Developmental Physiology

D. M. DERRY, E. MORROW, N. SADRE, AND K. V. FLATTERY. Brown and White Fat during the Life of the Rabbit 204

Experimental Morphogenesis

BEATRICE B. GARBER AND A. A. MOSCONA. Reconstruction of Brain Tissue from Cell Suspensions. I. Aggregation Patterns of Cells Dissociated from Different Regions of the Developing Brain 217

BEATRICE B. GARBER AND A. A. MOSCONA. Reconstruction of Brain Tissue from Cell Suspensions. II. Specific Enhancement of Aggregation of Embryonic Cerebral Cells by Supernatant from Homologous Cell Cultures 235

THOMAS F. LINSENMAYER. Control of Integumentary Patterns in the Chick 244

Brief Notes

CHARLES B. KIMMEL. Mauthner Axons in Living Fish Larvae 272

ROBERT EARLE WATERMAN. Use of the Scanning Electron Microscope for Observation of Vertebrate Embryos 276

Features

News, Opinion and Letters 282

Current Literature 288

NUMBER 3, MARCH

Developmental Biochemistry

RUDOLF ACHAZI AND T. YAMADA. Tyrosinase Activity in the Wolffian Lens Regenerating System 295

RICHARD A. FIRTEL AND ROBERT W. BRACKENBURY. Partial Characterization of Several Protein and Amino Acid Metabolizing Enzymes in the Cellular Slime Mold *Dictyostelium discoideum* 307

ROBERT M. PRATT, JR. AND C. T. G. KING. Inhibition of Collagen Cross-Linking Associated with β-Aminopropionitrile-Induced Cleft Palate in the Rat 322

ESTHER M. GOUDSMIT. Glycogen Content of Eggs and Embryos of *Arbacia punctulata* 329

MICHAEL I. SHERMAN. The Biochemistry of Differentiation of Mouse Trophoblast: Alkaline Phosphatase 337

Developmental Genetics

FRANCINE BOWDEN-ESSIEN. An *in Vitro* Study of Normal and Mutant Myogenesis in the Mouse 351

R. R. HUMPHREY. Genetic and Experimental Studies on a Mutant Gene (*c*) Determining Absence of Heart Action in Embryos of the Mexican Axolotl (*Ambystoma mexicanum*) 365

ANTONIE W. BLACKLER AND CORA A. GECKING. Transmission of Sex Cells of One Species through the Body of a Second Species in the Genus *Xenopus*. I. Intraspecific Matings 376

ANTONIE W. BLACKLER AND CORA A. GECKING. Transmission of Sex Cells of One Species through the Body of a Second Species in the Genus *Xenopus*. II. Interspecific Matings 385

Experimental Morphogenesis

NICHOLAS PURICHIA AND LAWRENCE C. ERWAY. Effects of Dichlorophenamide, Zinc, and Manganese on Otolith Development in Mice 395

GUSTAVO FLORES AND EARL FRIEDEN. Hemolytic Effect of Phenylhydrazine during Amphibian Metamorphosis 406

Brief Notes

KARL S. WITTMAN, PAUL L. KRUPA, IRWIN PESETSKY, AND MAX HAMBURGH. Electron Microscopy and Histochemistry of Tail Regression in the Brachyury Mouse 419

H. G. DICKINSON AND P. R. BELL. Structures Resembling Nuclear Pores at the Orifice of Nuclear Invaginations in Developing Microspores of *Pinus banksiana* 425

CHARLES J. EPSTEIN, JAMES A. WESTON, WESLEY K. WHITTEN, AND ELIZABETH S. RUSSELL. The Expression of the Isocitrate Dehydrogenase Locus (*Id-1*) during Mouse Embryogenesis 430

SUSAN B. SMITH AND JEAN-PAUL REVEL. Mapping of Concanavalin A Binding Sites on the Surface of Several Cell Types 434

Features

News, Opinion and Letters 443

Current Literature 450

NUMBER 4, APRIL

Developmental Biochemistry

RICHARD O. HYNES, GERALD A. GREENHOUSE, ROBERT MINKOFF, AND PAUL R. GROSS. Properties of the Three Cell Types in Sixteen-Cell Sea Urchin Embryos: RNA Synthesis 457

D. M. STOCCO, P. C. BEERS, AND A. H. WARNER. Effect of Anoxia on Nucleotide Metabolism in Encysted Embryos of the Brine Shrimp 479

ELENA CITKOWITZ. Analysis of the Isolated Hyaline Layer of Sea Urchin Embryos 494

JOHN W. CHASE AND IGOR B. DAWID. Biogenesis of Mitochondria during *Xenopus laevis* Development 504

Developmental Genetics

LEONARD RUBINSTEIN AND ULRICH CLEVER. Chromosome Activity and Cell Function in Polytenic Cells. V. Developmental Changes in RNA Synthesis and Turnover 519

Developmental Physiology

ROBERT DAVID ALLEN, L. JACOBSEN, J. JOAQUIN, AND L. F. JAFFE. Ionic Concentrations in Developing *Pelvetia* Eggs 538

JOSEPH T. TUPPER AND JOHN W. SAUNDERS, JR. Intracellular Permeability in the Early *Asterias* Embryo 546

MANFRED H. WEISENSEEL AND L. F. JAFFE. Membrane Potential and Impedance of Developing Fucoid Eggs 555

Brief Notes

DAVID A. NEWSOME. Cartilage Induction by Retinal Pigmented Epithelium of Chick Embryo 575

GEORGE M. MANIATIS AND VERNON M. INGRAM. Effect of Phenylhydrazine-Induced Anemia on the Appearance of Adult Hemoglobin in *Rana catesbeiana* Tadpoles 580

FRANCIS J. MANASEK AND ROBERT G. MONROE. Early Cardiac Morphogenesis Is Independent of Function 584

Features

News, Opinion and Letters 589

Current Literature 600

AUTHOR INDEX 607

SUBJECT INDEX 609

Information for Authors

Developmental Biology will publish in English original papers bearing on problems of development in the broadest sense; it will contain papers dealing with embryonic and post-embryonic development, growth, regeneration, and tissue repair, both of plants and animals. The journal will serve as meeting ground for studies on development employing techniques of a wide range of disciplines, e.g., biochemistry, biophysics, cytology, experimental morphogenesis, teratology, genetics, immunology, microbiology, pathology, pharmacology, and physiology.

Articles should not exceed 15,000 words and should be accompained by an abstract that gives, in 200 words or less, a synopsis of the work including methods and results. *Brief Notes* must not exceed 2000 words. The usual format is: abstract, introduction, methods and materials, results, and discussion, but authors are encouraged to present their material in the most logical and approprate form. Indicate the address for galley proof. In order to save time, page proofs will not be sent to authors. Our aim is to keep the publication time less than 6 months. Two copies of the manuscript (the original and one carbon) and two copies of the figures should be mailed to Dr. Elizabeth Hay, Department of Anatomy, Harvard Medical School, Boston, Massachusetts 02115.

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. They must be typewritten, double-spaced, on one side of white bond paper about 8-½ x 11 inches in size, with the pages numbered consecutively. Include with full length articles a running page headline not exceeding 35 letters and spaces. Use footnotes sparingly, if at all. Cite them, using superscript numbers, in consecutive order in the text. Type them consecutively on a separate sheet. Acknowledgments and figure legends should also be typed, double-spaced, as separate sections.

Tables should be used to condense data referred to in the text. They should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text, and collected at the end of the manuscript. Give each table a concise, descriptive heading. Tables should be so composed that the material they contain can be grasped without reference to the text.

Figures should be numbered consecutively in the order of their appearance and each should have a descriptive legend. Indicate magnifications. Line drawings should be made with India ink on smooth white paper or the equivalent. Where original drawings for the printer's use are larger in size than 8-½ x 11, enclose smaller, unmounted prints for editorial use. Photographs should be unmounted, actual size, labeled and ready for half-tone reproduction. Use glossy prints with strong contrast; photo-offset printing reduces contrast. When several figures make up a plate, mount them on the back of a piece of photographic paper or indicate in some other way how they should be mounted. Use cardboard only to protect the package in mailing. The engraver will tool thin white lines between mounted figures later. Maximum size for figures is 5-½″ x 8″ for double column and 2-⅝″ x 8″ for single column. Where large micrographs are especially helpful, the full page may be utilized (6-⅞″ x 10″). To allow for trimming by the printer, add ⅛″ to width and ¼″ to length of the original print, and place lettering, including figure numbers, no closer than ¾″ to the margin. Figure numbers and lettering should be uniform size, 4–7 mm high. Indicate on the galley proof where the figures are to be placed. Mark all figures with the author's name and address. The author will defray the expense for colored plates. Two pages of half-tone figures per article will be published without cost to the author; a charge of $50 per page will be required for pages in excess of this number. Fifty gratis reprints are supplied. Additional reprints may be ordered when galley proof is returned.

References to the literature may be cited in one of the following forms: Doe (1955) has observed that . . . ; (Doe, 1955; Doe *et al.*, 1960); (Doe, 1961, p. 250). Use suffixes a, b, etc. following the date to distinguish two or more works by the same author(s) in the same year, e.g., Doe 1960a, b. Arrange literature citations in the bibliography alphabetically according to the surname of the author, using the following order of items: author(s), date of publication, title of article or book, journal name, volume number, inclusive pages, publisher and city (for books only). Abbreviate titles of journals in accord with Chemical Abstracts' *Service Source Index* (1969 Edition).

Announcements should be sent to the Editor-in-Chief to arrive by the 15th of the month preceding the issue in which the material is to appear. *News, opinion and letters* should be sent to Dr. Eugene Bell, Department of Biology, Massachusetts Institute of Technology, Cambridge, Massachusetts 02138, U.S.A. The correspondence section is not to be used as a medium for rapid publication of data. It is a forum for active exchange of ideas and opinions about research in developmental biology. Half-tone figures are not accepted, but in suitable cases line drawings will be. Material related to *Current Literature* should be sent to Dr. Francis J. Manasek, Department of Anatomy, Harvard Medical School, Boston, Massachusetts 02115, U.S.A.
